CONTENTS

- 1 carrier for 1, 2, 4, 5 or 6 bicycles.
- 2 M10 bolts, 2 M10 rings with 2 self-locking nuts (Use the 2 M10 bolts with self-locking nuts to screw the bicycle carrier to a flat, sturdy base. Make use of the 2 M10 holes on the outside).
- Fix the bicycle carrier only on sub-soil, which is solid enough to carry the carriers incl. bicycles.
- Sufficient hooks, wing nuts; spring washer (D), M10 nuts and straps.
- Check all parts before use. If in doubt consult your supplier.

INSTRUCTIONS FOR USE

- Screw the supplied M10 nut onto the universal hook (image 4).
- Place the bicycle hooks on the desired height (image 4).
- Follow the instructions to load bicycles (image 1-3).
- For bicycles with mudguard; put hook between wheel and mudguard. Tighten wing nut well (image 4).
- The optimal gas spring pressure is at $\pm 90^\circ$ (image 5).
- Make sure the bikes fastened using the included strap thoroughly (image 5 C) around the rim, around the rear-wheel holder tube and around the wheel rails.
- (Option) Assemble rear wheel holder. Possibility for short frames (picture 6).

Caution: Note that the gas spring exerts a pressure of 60 kg/600 N on the holder so take care when opening and closing the front wheel holder with the gas spring! (Risk of pinched/crushed fingers and limbs.) The VK carriers are not suitable for use by, or in the proximity of, children & unauthorized persons.
